Outdoor Oil insulated type (MV-PT)

Steps down medium voltage to standardized secondary levels for accurate voltage measurement, metering, and protection in outdoor systems. Designed with oil insulation and flexible configurations for diverse MV applications.

- Primary ratings up to **36 kV**
- Different voltage ratios available
- Single-phase or dual-phase and three phase configuration available
- Multi-winding with open-delta option
- Continuous voltage factor up to **1.9×**
- Insulation level up to **36 kV / 170 kVp BIL**
- 50–60 Hz frequency
- Custom electrical, mechanical, and mounting options
- Brass/copper primary and secondary terminals

Application:

Standex GRID Electronics | narayan powertech pvt. ltd.
